

ELITE SPORTS COOLING VEST

The Elite Sports Cooling Vest provides hours of cooling comfort and heat-stress prevention. Phase Change Material (PCM) releases long lasting, temperature specific (14°) cooling relief to reduce heat induced fatigue therefore increasing mental alertness.

The PCM is non-toxic, non-flammable, durable, reusable, lighter than water, and does not produce condensation.

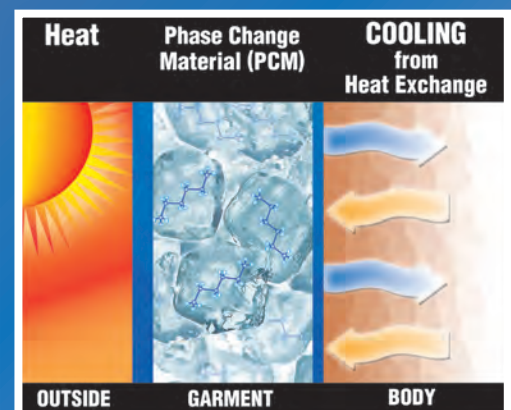

As used by Formula 1 Drivers

Cool Pax with segmented design

- Works effectively in all temperature environments - eg high humidity
- Targeted cooling for key heat zones, promotes comfort and enhances performance
- Provides targeted cooling comfort and heat stress prevention
- Lightweight (1.9 kgs), durable and reusable
- PCM releases long-lasting temperature-specific (14°) cooling relief
- Additional PCM inserts are available for extended relief
- Can be activated in ice water, no electricity required

ELITE SPORTS COOLING VEST

INSTRUCTIONS - VESTS:

Submerge the vest in water for 1-2 minutes. Remove and gently squeeze out excess water. The vest will remain hydrated for several hours and may be reactivated by submerging in water as needed.

INSTRUCTIONS - INSERTS:

Submerge inserts in ice water for up to 45 minutes or place in freezer until completely solidified. Once solidified, place the insert into the garment. Inserts will remain cool for up to 4 hours. To reactivate simply complete the process.

INSTRUCTIONS - CARE:

Hand wash using mild detergent in warm water for 30 seconds. Rinse, ring and hang to dry.
