EVAPORATIVE COOLING

HOW IT WORKS

The combination of unique fabrics creates a water management system. The HyperKewl™ fabric absorbs, stores and releases water within the multi-layered material. Water is released through evaporation, energy is consumed, and a chill effect is created. The HyperKewl fabric actually cools the body exactly the same way the body cools itself – through evaporation.

It's as easy as

1

Submerge the item in water for 30 - 60 seconds

2

Gently squeeze out excess water

3

Wear and Stay Cool

RESULTS

Users can expect the evaporative cooling fabric to provide temperatures that are 15 degrees cooler than the ambient temperature, depending on airflow.

BENEFITS

- Cost effective personal cooling solution
- Provides extended relief from heat fatigue and heat stress
- Lightweight, durable and non-toxic
- Easy to activate and is re-usable
- Offers hours of cooling relief and protection
- Effective in a wide variety of environments

HYPERKEWL™ EVAPORATIVE COOLING PRODUCTS

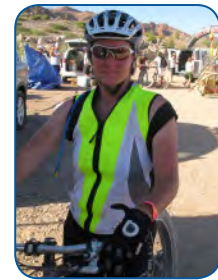

6529

STANDARD SPORTS COOL VEST (AQUA VEST)

- Simple V-neck with zipper closure; work for a wide range of people and uses
